

Dr. Chia-Lin Huang

Research Associate at Boston University

Dr. Chia-Lin Huang is a Research Associate at Boston University. She was working as a Research Scientist at the Institute for the Study of Earth, Oceans, and Space, University of New Hampshire, Durham, USA.

Dr. Huang received her PhD from Boston University in January 2008. Her research interests are the structure and dynamics of Earth's magnetosphere and their effect on high-energy particles at the near Earth environment, including radiation belt electron's acceleration and loss mechanisms, and galactic cosmic ray access to the lunar environment using satellite data, global MHD simulation and particle trajectory code.
