

Kamen Kozarev

Ideator and Space Physicist

Kamen is very lazy, that is why he spends a lot of time thinking of how to make computers do his work for him. He usually has twice as many ideas as time to think about them some more. When not working on the space data visualization project of Space Challenges, he likes to study killer particles coming from the Sun. Kamen has made great contribution to the program and extended its international reach. He is a proud member of our Core Team.
